AM Envelope Holger Strauss, 2013-01-29 This book shows the potential of Additive Manufacturing (AM) for the development of building envelopes: AM will change the way of designing facades, how we engineer and produce them. To

achieve today's demands from those future envelopes, we have to find new solutions. The term 'AM Envelope' (Additive Manufacturing Envelope) describes the transfer of this technology to the building envelope. Additive Fabrication is a building block that aids in developing the building envelope from a mere space enclosure to a dynamic building envelope. AM offers the opportunity to manufacture facades 'just in time'. It is no longer necessary to store or produce large numbers of parts in advance. Initial investment for tooling can be avoided, as design improvements can be realized within the dataset of the AM part. AM is based on 'tool-less' production, all parts can be further developed with every new generation. The basic principle of AM opens a fascinating new world of engineering, no matter what applications can be found: to 'design for function' rather than to 'design for production' turns our way of engineering of the last century upside down. A collection of AM applications therefore offers the outlook to our (built) future in combination with the acquired knowledge.

A Confucian Analysis on the Evolution of Chinese Patent Law System Nan Zhang, 2020-07-08 This book comprehensively discusses the main features of the Chinese patent law system, which not only legally 'transplants' international treaties into the Chinese context, but also maintains China's legal culture and promotes domestic economic growth. This is the basis for encouraging creativity and improving patent law protection in China. The book approaches the evolution of the Chinese patent system through the ancient Chinese philosopher Confucius's classic principle, offering readers a fresh new way to understand and analyze Chinese patent law reforms, while also outlining how Confucian insights could be used to improve the enforcement of patent law and overall intellectual property protection awareness in China. It examines ancient Chinese innovation history, explores intellectual property from a Confucian perspective, and discusses the roots of Chinese patent law, as well as the past three amendments and the trends in the ongoing fourth amendment. In addition to helping readers grasp the mentality behind the Chinese approach to patent law and patent protection, the book provides an alternative research methodology and philosophical approach by demonstrating Confucian analysis, which provides a more dynamic way to justify intellectual property in the academic world. Lastly, it suggests future strategies for local industries in the legal, cultural and sociological sectors in China, which provide benefits for domestic and overseas patent holders alike. The book offers a valuable asset for graduate students and researchers on China and intellectual property law, as well as general readers interested in Asian culture and the philosophy of law.

Environmentally Sensitive Channel- and Bank-protection Measures John McCullah, Donald H. Gray, National Cooperative Highway Research Program, 2005 TRB's National Cooperative Highway Research Program (NCHRP) Report 544: Environmentally Sensitive Channel- and Bank-Protection Measures examines environmentally sensitive channel- and bank-protection measures and includes recommended design guidelines for their application and a selection system for helping to

determine the most appropriate channel- and bank-protection measure. The selection system is presented as an interactive software program entitled Greenbank, which can be found on the accompanying CD-ROM (CRP-CD-58). The selection system software (CRP-CD-58) is available for download in an ZIP format.

Islam, Women's Sexuality and Patriarchy in Indonesia Irma Riyani, 2020-11-26 This book explores the intimate marital relationships of Indonesian Muslim married women. As well as describing and analysing their sexual relationships, the book also investigates how Islam influences discourses of sexuality in Indonesia, and in particular how Islamic teachings affect Muslim married women's perceptions and behaviour in their sexual relationships with their husbands. Based on extensive original research, the book reveals that Muslim women perceive marriage as a social, cultural, and religious obligation that they need to fulfil; that they realise that finding an ideal marriage partner is complicated, with some having the opportunity for a long courtship and others barely knowing their partner prior to marriage; and that there is a strong tendency, with some exceptions, for women to consider a sexual relationship in marriage as their duty and their husband's right. Religious and cultural discourses justify and support this view and consider refusal a sin (dosa) or taboo (pamali). Both discourses emphasise obedience towards husbands in marriage.

The CERT Oracle Secure Coding Standard for Java Fred Long, Dhruv Mohindra, Robert C. Seacord, Dean F. Sutherland, David Svoboda, 2011-09-06 "In the Java world, security is not viewed as an add-on a feature. It is a pervasive way of thinking. Those who forget to think in a secure mindset end up in trouble. But just because the facilities are there doesn't mean that security is assured automatically. A set of standard practices has evolved over the years. The Secure® Coding® Standard for Java™ is a compendium of these practices. These are not theoretical research papers or product marketing blurbs. This is all serious, mission-critical, battle-tested, enterprise-scale stuff." —James A. Gosling, Father of the Java Programming Language An essential element of secure coding in the Java programming language is a well-documented and enforceable coding standard. Coding standards encourage programmers to follow a uniform set of rules determined by the requirements of the project and organization, rather than by the programmer's familiarity or preference. Once established, these standards can be used as a metric to evaluate source code (using manual or automated processes). The CERT® Oracle® Secure Coding Standard for Java™ provides rules designed to eliminate insecure coding practices that can lead to exploitable vulnerabilities. Application of the standard's guidelines will lead to higher-quality systems—robust systems that are more resistant to attack. Such guidelines are required for the wide range of products coded in Java—for devices such as PCs, game players, mobile phones, home appliances, and automotive electronics. After a high-level introduction to Java application security, seventeen consistently organized chapters detail specific rules for key areas of Java development. For each area, the authors present noncompliant examples and corresponding compliant solutions, show how to assess risk, and offer references for further information. Each rule is prioritized based on the severity of consequences, likelihood of

introducing exploitable vulnerabilities, and cost of remediation. The standard provides secure coding rules for the Java SE 6 Platform including the Java programming language and libraries, and also addresses new features of the Java SE 7 Platform. It describes language behaviors left to the discretion of JVM and compiler implementers, guides developers in the proper use of Java's APIs and security architecture, and considers security concerns pertaining to standard extension APIs (from the javax package hierarchy). The standard covers security issues applicable to these libraries: lang, util, Collections, Concurrency Utilities, Logging, Management, Reflection, Regular Expressions, Zip, I/O, JMX, JNI, Math, Serialization, and JAXP.

The Game Laurie R. King, 2004-03-02 It's only the second day of 1924, but Mary Russell and her husband, Sherlock Holmes, find themselves embroiled in intrigue. It starts with a New Year's visit from Holmes's brother Mycroft, who comes bearing a strange package containing the papers of an English spy named Kimball O'Hara—the same Kimball known to the world through Kipling's famed Kim. Inexplicably, O'Hara withdrew from the "Great Game" of espionage and now he has just as inexplicably disappeared. When Russell discovers Holmes's own secret friendship with the spy, she knows the die is cast: she will accompany her husband to India to search for the missing operative. But Russell soon learns that in this faraway and exotic land, it's often impossible to tell friend from foe—and that some games aren't played for fun but for the highest stakes of all...life and death. BONUS: This edition contains an excerpt from Laurie R. King's *Garment of Shadows*.

The Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings, 2005-12 Provides general design and technical recommendations to help property owners, developers, and Federal managers rehabilitate historic properties.

Medical Mnemonics Tanmay Mehta, Medical Mnemonics by Dr. Tanmay Mehta

Visit Me in California Cooley Windsor, 2008-08-13 Deftly moving between the comic and the tragic, the sacred and the profane, this collection of short stories is populated by modern children, ancient poets, dying men, and your basic, mundane Greek gods. Windsor turns familiar stories from the Bible and from myth inside out, exploring the feelings of minor characters and looking at events from imaginative perspectives. His prose is rich with detail and emotion and he touches on themes of art and artifice, success and failure, family and its sacrifices, and expectations met or missed. In "The Last Israelite in the Red Sea," a follower of Moses who dallies during their Exodus finds it more difficult to walk across the bottom of the temporarily displaced Red Sea without shoes. "Four of the Times My Sister Cried" follows a young narrator as his family rehearses for his mother's death and then, as they must, lives without her. The wry "The Art of War" has characters from Homer to a courtesan talking shop about the battle of Troy from their perspectives. Set as a series of short pieces, "The Fleshly School of Poetry" tells of lessons learned and lessons taught. With its explorations of expectations, "Meet the Author" gives readers intimate portraits of various plans or coping mechanisms people put up when death draws close. "The End of

the World” approaches the Rapture with a humorously practical spin: wouldn’t the angels need a plan to ensure that it goes smoothly? “In Parting” explores some of the troubles with family, especially when a sister’s child turns out to be a marionette. The geographically explicit “Three Mediums in San Francisco” touches on frustrated and imagined eroticism. The collection ends with “The Hilton Epiphany,” a fitting closer in which divinity comes to an unlikely person in an unlikely place.

Agricultural Policy of the United States Stephanie A. Mercier, Steve A. Halbrook, 2020-04-01 This book serves as a foundational reference of U.S. land settlement and early agricultural policy, a comprehensive journey through the evolution of 20th century agricultural policy, and a detailed guide to the key agricultural policy issues of the early 21st century. This book integrates the legal, economic and political concepts and ideas that guided U.S. agricultural policy from colonial settlement to the 21st century, and it applies those concepts to the policy issues agriculture will face over the next generation. The book is organized into three sections. Section one introduces the main themes of the book, explores the pre-Columbian period and early European settlement, and traces the first 150 years of U.S. agricultural policy starting with the post revolution period and ending with the “golden age” of agriculture in the early 20th century. Section two outlines that grand bargain of the 1930s that initiated the modern era of government intervention into agricultural markets and traces this policy evolution to the early days of the 21st century. The third section provides an in-depth examination of six policy issues that dominate current policy discussions and will impact policy decisions for the next generation: trade, environment/conservation, commodity checkoff programs, crop insurance, biofuels, and domestic nutrition programs.

The Changing Dynamic of Government-Nonprofit Relationships Kirsten A. Grønbjerg, Steven Rathgeb Smith, 2021-02-11 We advance nonprofit scholarship by using the conceptual framework of policy fields to examine differences across nonprofit fields of activity. We focus on the structure of relationships among four sectors (government, nonprofit, market, informal) and how relationships differ across policy fields (here health, human services, education, arts and culture, and religion). The fields differ notably in the economic share that each sector holds and the functional division of labor among the sectors. Systemic differences also exist in how the nonprofit sector interacts with the government, market, and informal sectors. The policy fields themselves operate within national contexts of distinctive economic and political configurations. The framework explores how government-nonprofit relationships differ across policy fields, the factors responsible for this variation, and offers predictive capacity to generate hypotheses and research designs for additional research. We provide insights on how nonprofit organizations differ in key sub-fields with direct relevance for policy and practice.

Resource Allocation Theory Applied to Farm Animal Production Wendy M. Rauw, 2009 This book is about resource allocation matters with the aim to further development thoughts and models on resource allocation applied to livestock

production. It contains 18 chapters divided into 4 parts which discuss resources and resource allocation patterns, trade-offs, metabolic constraints to resource allocation and the process of homeorhesis with a special emphasis to homeorhesis during heat stress; the relationship between food intake and resources allocated to body maintenance, growth, reproduction and the immune response; the consequences of high production efficiency in pigs, poultry and dairy cattle and the consequences of improved production by means of biological engineering and options to include resource allocation matters in the breeding objective, animal welfare and in resource allocation modelling.

Guide to the Criminal Prisons of Nineteenth-Century England Rosalind Crone,2018-09-18 The penal system in nineteenth-century England was incredibly complicated. It comprised two types of prison: convict prisons and local prisons. While convict prisons were under the direct control of the Home Office, local prisons were, until the 1877 Prison Act, managed by a whole host of different local authorities, from counties and boroughs to liberties and even cathedrals. Moreover, included among convict prisons were penitentiaries, public works prisons and prison hulks (also known as floating prisons), while local prisons included gaols, bridewells and lock-ups. This complexity has led to a raft of studies of individual institutions. Nevertheless, big gaps in our knowledge remain. Simply put, we don't even know how many prisons existed in nineteenth-century England. This Guide to the Criminal Prisons of Nineteenth-Century England recovers much of that lost landscape. It contains critical information about operational dates, locations, jurisdictions, population statistics, appearances in primary and secondary sources and lists of surviving archives for 844 English prisons--including local prisons (419), convict prisons (17), prison hulks (30) and lock-ups (378)--used to confine those accused and convicted of crime in the period 1800-1899. Furthermore, through analysis of the accumulated data, the book challenges several important assumptions on the emergence of the modern prison in Britain. It also draws attention to previously unexplored patterns in the preservation and management of penal records.

Anti-Jewish Violence Jonathan Dekel-Chen,David Gaunt,Natan M. Meir,Israel Bartal,2010-11-26 Although overshadowed in historical memory by the Holocaust, the anti-Jewish pogroms of the late 19th and early 20th centuries were at the time unrivaled episodes of ethnic violence. Incorporating newly available primary sources, this collection of groundbreaking essays by researchers from Europe, the United States, and Israel investigates the phenomenon of anti-Jewish violence, the local and transnational responses to pogroms, and instances where violence was averted. Focusing on the

period from World War I through Russia's early revolutionary years, the studies include Poland, Ukraine, Belorussia, Lithuania, Crimea, and Siberia.
